Another Side Of The Coin...

The causes of unemployment are numerous and varied. The most obvious one is general depression or recession those of us who were around during the 30's will fully understand this. Another is changes in demand and use for products, which result in the decline and the ultimate elimination of industries—like, say, harness making. The impact of these is usually found? in particular limited areas where there industries congregated in their palmy days. A current and tragic example of this is found in the coal mining districts of West Virginia and elsewhere. Still another is technological unemployment, where the machine replaces the man, and more efficient and economical production is \\$ the result. And as a cause of unemployment the trade situation is certainly an element in a world which becomes ever more competitive, and in which goods can be moved back and forth almost instantly.

Then, there is another—and it is one which has been given scant attention so far. The lead article in the which took place in that city Sat-April issue of Harper's Magazine, written by Edward T. urday, April 20. The ceremony was es of St. Louis, was revealed. Chase, a consultant and writer on public affairs, deals with it. It consists of the way in which American education. Miss Mildred Teetle and Russ in Detroit. tion is turning millions of young people into unemploy- Nurenburg were their attendants. The Frederic Parent-Teacher

Mrs. Richard Rasmusson was the honored guest at a surprise baby shower given Wednesday, April 24th at the Jim Bourrie home by Mrs. Bourrie, Mrs. Harold Hat-field, Jr., Mrs. Carl Nielson Mrs. Larry McNamara, Mrs. William

Cox and Miss Greta Basmussen. The evening began with a chop suey supper for the thirty-one ladies present for the occasion. The U-shaped table was graced with tall silver candelabra and white tapers, the centerpiece being a cake made in the form of a canopied cradle holding a baby doll After supper, baby bingo was en joyed, with prizes going to Mrs Harold Rasmussen, Mrs. Carroll Wert, Mrs. Lyle Billsby, Mrs. Les Goss, Mrs. Grover Cason, and Mrs. Leonard Allison. The door prize was won by Mrs. Frank May. Ther the guest of honor began opening her gifts, which were placed in a old-fashioned baby buggy decor ated in shades of green. were viewed and admired by the guests, and after a period of pleasant conversation the ladies dePERFORMANCE:

IF YOU KNEW WHAT HE KNOWS...YOU'D BE DRIVING THE 1963 TOTAL PERFORMANCE FORD

Ford is traditionally the nation's Number One police car. The reason: Total Performance!

When it comes to cars the police don't take chances. Put yourself in a State Trooper's shoes. Every day you must patrol hundreds of miles in your cruiser. Mileage and time grind into a man and his machine, but when the bell rings you've got to be ready. Chase. Turn. Corner. Quick stop. You've got to be

able to do it all If you're going to do your job. Listen to a trooper list the reasons why he prefers a Ford and you realize how difficult it is for any car to measure up to his standards. The car must be strong...it has to stand up to big mileage. It must be silent . . . when you practically live In a car a rattle can sound like a kettle drum. It must be swift ... powerful enough to catch any car on the road. It must be sure... dependable even in the face of the unexpected. Strong. Silent. Swift. Sure. A four-word outline of total performance. The police demand it. That is why they choose the total performance Ford. Why should you settle for anything less?

Whatever your special demands and needs, the total performance Ford is the car most likely to satisfy you all the way down the line. You can prove this for yourself.

First, look at Ford's astounding record in open competition this year in the grueling Daytona, Riverside and Atlanta 500's, and in the demanding Pure Oil Performance Trials. Only a car with total performance could roll up so many impressive wins.

Second, before you buy any new car, test-drive the solid, silent Super Torque Ford. If you haven't driven one lately, you can't really know what a new ford is like. Make this important discovery-if it's built by Ford, it's built for performance . . total performance.
